Skills

- Python, Java, C++, C, HTML, CSS, JavaScript, Kotlin
- LaTeX
- MySQL, PostgreSQL, SQLite, Data Analysis, MongoDB
- Linux, Windows
- React.js, Tailwind CSS, REST APIs, Node.js, Express.js
- Machine Learning, Deep Learning, Computer Vision, Scikit-learn, Hugging Face
- Git, GitHub, Android Studio, VS Code, Postman, Cloud Deployment

PROFILE

Computer Science graduate with strong academic and project-based experience in Artificial Intelligence, Machine Learning, Computer Vision, Software Development, and Database Systems. Skilled in building intelligent systems, software applications, and data-driven solutions using modern technologies. Proficient in Python, Java, C++, SQL, React, and software engineering principles. Experienced in research, technical documentation, teamwork, and problem-solving with a strong passion for real-world applications.

EDUCATION

Bachelor of Science in Computer Science 2022 – 2026

Sukkur IBA University
CGPA: 2.85 / 4.00

Intermediate

The City School, Sukkur
Grade: A+

2021

Matriculation

The City School, Sukkur
Grade: A+

2019

PROFESSIONAL EXPERIENCE

AI / Machine Learning Intern

STACKSHORIZON

JULY 2026 – AUGUST 2026

- Assisted in developing Machine Learning models for real-world applications.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA).
- Trained and evaluated ML models using Python and Scikit-learn.
- Collaborated with the AI team on model optimization and project documentation.

PROJECTS

Explainable AI-Based Intrusion Detection System (FYP)

FINAL YEAR PROJECT

2025 – 2026

- Developed an AI-based intrusion detection system using machine learning techniques
- Performed data preprocessing, feature engineering, and model training
- Applied Explainable AI techniques to improve model interpretability
- Evaluated performance on cybersecurity datasets

Multi-Label Clothing Classification

COMPUTER VISION PROJECT

2026

- Built a deep learning CNN model for multi-label clothing classification
- Used transfer learning to improve accuracy
- Performed image preprocessing and dataset augmentation
- Tuned hyperparameters for optimized performance

Expense Dashboard Pro (Android Application)

MOBILE APP DEVELOPMENT

2026

- Developed an Android expense tracking application using Kotlin
- Implemented budgeting, expense tracking, and CRUD operations
- Designed modern UI using Jetpack Compose
- Integrated local database for offline storage

Predictive Maintenance System

MACHINE LEARNING PROJECT

2024

- Built machine learning models to predict equipment failures
- Performed feature engineering on historical maintenance data
- Applied classification/regression techniques for prediction
- Visualized insights for decision-making

RESEARCH EXPERIENCE

Intrusion Detection System (IDS)

- Focus on Artificial Intelligence, Machine Learning, and Deep Learning for Cybersecurity applications
- Research on anomaly detection techniques for network security
- Study and implementation of Explainable AI methods for model interpretability

Machine Learning and Computer Vision Research

- Exploration of deep learning techniques for image classification tasks
- Study of transfer learning and data augmentation approaches
- Analysis of predictive modeling techniques for real-world applications

CERTIFICATIONS

- Google AI Essentials (2026)
- Google Prompt Engineering Essentials(2026)
- Cybersecurity Workshop(2026)
- Agentic AI Workshop(2026)
- DevOps Workshop(2026)
- Flutter Workshop(2026)
- TEDx Participant(2025)
- SIBATHON Member(2026)
